

Vision Lentis

High Performance Bench Magnifier for inspection, manipulation and material rework

Bench magnifiers are typically used for:
illuminated inspection of small parts...
or manipulation and rework (cutting, soldering,
welding, polishing and painting).

Traditional bench magnifiers suffer from:

- Instability
- Optical distortion (often at the edge of the image)
- Reflection disturbance (from ambient light)
- Inadequate illumination

Lentis is a state of the art magnifier, designed to incorporate the optical, ergonomic and mechanical design excellence adopted throughout Vision Engineering's range of award winning stereo microscopes, measuring systems and optical aids.

Technical Data

Optical Data		
Viewing Lens	Working Distance	Field of View
2.5 dioptres	80 - 250mm	250mm

Lighting Data	
True colour optimised fluorescent tubes. Ultraviolet (UV) option available	
2 x 4W with double reflectors	2,000 hours

Accessories
Dust cover Replacement 4W fluorescent (White & UV)

Features and Benefits

- High specification optical lens for minimal distortion across the entire field of view. The lens is finished with a multi-layer anti-reflective coating to minimise ambient reflection disturbance.

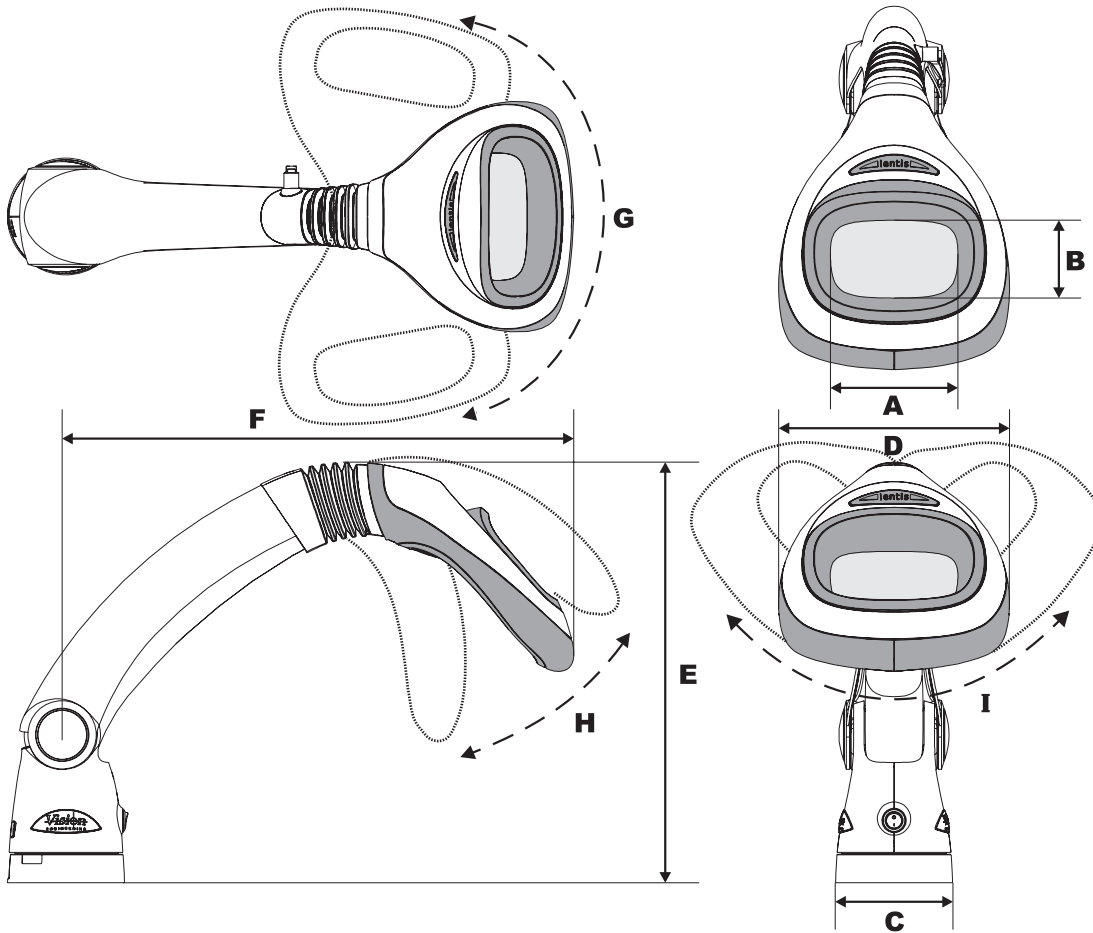

Ease of Use

- 2.5 dioptre lens provides optimal magnification, field of view and working distance for optimum comfort.
- Long life, ultra bright, reflected fluorescent illumination for superb image clarity and colour rendition.

Versatility

- Ultra modern stand design with quick move base for high stability and versatility.

Dimensions

A = 134mm
 B = 82mm
 C = 132mm
 D = 240mm

Height

E = 290mm - 540mm

Reach

F = 460mm - 640mm

G = Yaw

80° - 160°

H = Viewing angle

65° - 20°

I = Roll

22.5° - 45°

Unpacked weight

Head & Stand = 4.0kg

Packed weight

Head & Stand = 6.0kg

Power Supply

All Lentis units are powered with a wall plug socket transformer, available in all worldwide plug configurations and delivering 9V DC to the Lentis illuminator in the optical head or stand.
